Drilling tools

N.U.B. ENGINEERING LTD. - FOUNDATION DRILLING TOOLS

BOHRTECHNIK FÜR DEN SPEZIALTIEFBAU

- The union between N.U.B. Engineering and STDS-JANTZ has combined the skill and expertise gained by both companies over the last 30 years.

Working together to meet the needs of drilling contractors around the world the two companies have combined the most modern technology with a well-trusted, skillful workforce in order to design and manufacture all types of drilling tools.

- N.U.B. Engineering has been producing high quality drilling tools since its conception in 1980.

With over 30 years of highly skilled experience and a practice of modern design and construction techniques N.U.B. Engineering consistently strives to improve on its market position. This is achieved by supplying individual quality equipment that provides solutions to contractor's requirements.

- The provision of engineered solutions to meet individual requirements is the aim of STDS-JANTZ.

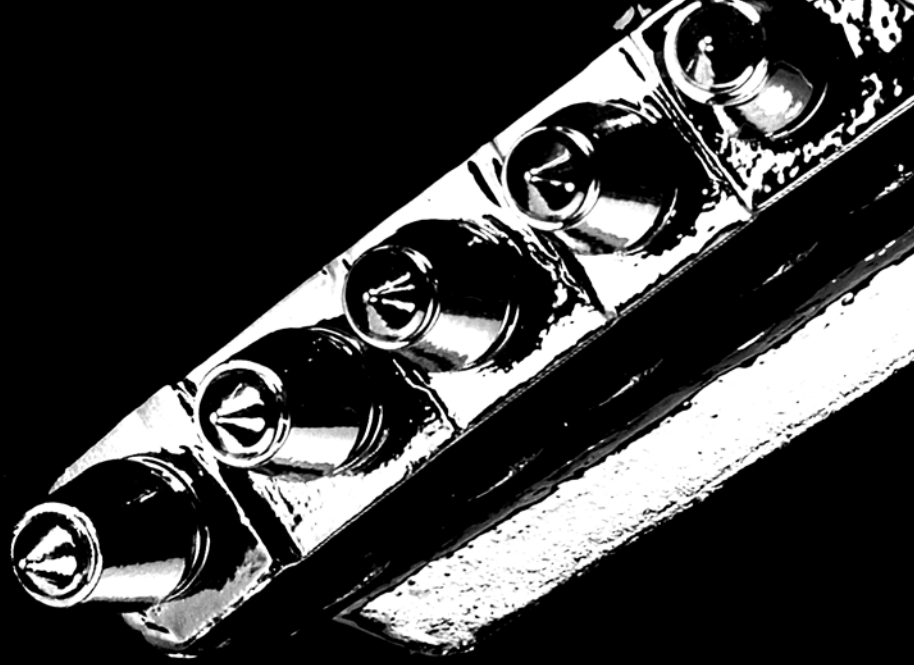

The use of modern technology combined with forward thinking has seen STDS-JANTZ grow in strength and increase its market share by providing innovative design and manufacture to meet drilling requirements for more than 30 years. STDS-JANTZ clear goal is to supply quality solutions that keep their promise. This goal is achieved by the quality skills of an experienced team and the use of forward-thinking technology.

N.U.B. ENGINEERING LTD. - FOUNDATION DRILLING TOOLS

BOHRTECHNIK FÜR DEN SPEZIALTIEFBAU

Contents

01. CF-Auger for vertical drilling	5
02. CFA	31
03. Rotary	41
04. Water Well and Soil Investigation	51
05. Drill Rods / Casing	55
06. Geothermal	59
07. Soilmixing	63
08. Grout/Concrete Swivel and Shock Absorber	65
09. Horizontal Drilling	67
10. Rotary Heads	77
11. Specialized Manufacture	83
