

THE PRODUCTS

Drilling tools

- **NUB Engineering and STDS-Jantz have now been in union for over 9 years combining their individual skills gained over the last quarter century to provide solutions for the needs of drilling contractors around the world.**

Using modern technology and state of the art design programs with the knowledge of a skilled workforce all types of drilling equipment can be produced.

No drilling equipment is standard to NUB Engineering and STDS-Jantz. Bespoke tools are manufactured to the requirements of our valued clients for all types of ground conditions.

- **NUB Engineering has been producing high quality drilling tools since its conception in 1980.**

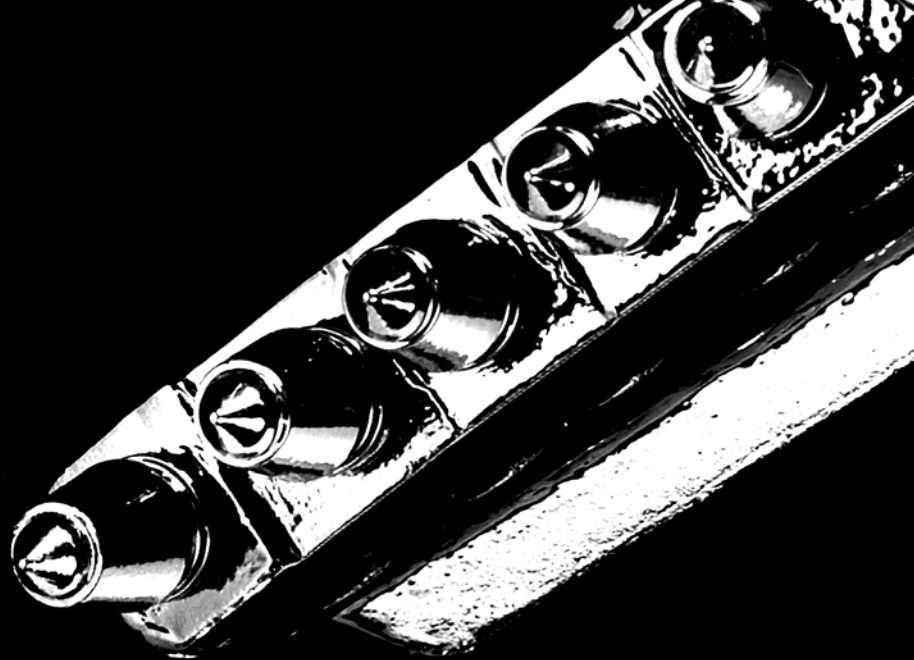

Founded in 1980 (NUB Engineering) and 1981 (STDS-Jantz) the combined companies use their accumulated knowledge to constantly strive to improve both quality and efficiency for all the equipment manufactured.

- **Engineered solutions are always provided to ensure individual requirements are met.**

No drilling problems are too big or too small. We strive to find better solutions to contractors requirements taking into consideration new and innovative rig manufacture.

STDS-Jantz and NUB Engineering have a clear goal to supply quality solutions that achieve their requirements. Forward thinking by their experienced team ensures that this target is met.

Contents

01. Drilling rigs premodrill	5
02. Rental fleet	7
03. CF-Auger for vertical drilling	9
04. CFA	35
05. Rotary	45
06. Displacement Ram Lance	55
07. Water Well and Soil Investigation	57
08. Drill Rods / Casing	61
09. Geothermal	65
10. Soilmixing	69
11. Grout/Concrete Swivel and Shock Absorber	71
12. Horizontal Drilling	73
13. Rotary Heads	83
14. Specialized Manufacture	89
